

RADIO: THEORY AND PRACTICE - Henrik Hargitai

Code: BMA-MEDD-601/c

Type: practice

Wednesdays 18.00-19.30

Room: PC Laboratory

First class: 19. September

We investigate the evolution of electronic media from radio to television to new media in the former East Block countries, with special focus on Hungary and the Soviet Union. We investigate the evolution of both the institutional background and the content structurization (formatting), the main players and the peripheral ones. We will also discuss clandestine operations during war and peace. In addition, students create their own radio program.
