

**Code: BMI-FLMD-322E.16**

---

**Course title: Approaches to Space**

---

**Course convener:** Gabriella Szigethy

---

**Class time and place:** Monday 12.30 to 14.00; Múzeum krt. 6 - 8., 2nd floor room 251.

---

**Course type:** Seminar

---

**Course content:** Approaches to Space has been an accumulative project with a varying number of students with varying backgrounds throughout the past few semesters and offers an insight into localized, geographical experiences. Our aim is to reflect on Hungary's current political, social and cultural situation in a second language, English from a practical point view.

By practical I mean we read academic texts about case studies from around the world and bring together our everyday experiences here in a Hungary in a closed Facebook group. The two approaches add up to what I mean by a localized, critical view and ideally practice of staying or living in Hungary.

---

**Requirements:**

---

**Learning outcomes and methods:**

---

**Indicative Reading:** The reading list of the class will be available at the beginning of the semester and will be completed in our first class with additions from the students.
