

Kurzus kódja(i): BMA-FLMD-376.21, BMI-FLMD-376E.16

Kurzus címe: The Basics of Continuity and Script Supervising

Tanár neve: Bacskai Brigitta

Kurzus időpontja, helye: Friday 14:45-16:15 computer room

Kurzus típusa: practice

Kurzus leírása: The aim of this course is introducing the complexity of script supervising. Some think that a scripty just sits on set and writes some notes about the take but this profession is much more complex than that. The script supervisor is responsible for measuring the script, follow up the corrections/new versions, making a precise breakdown of the script, communicating with all the departments, delivering all the notes from set to the editing department, writing daily reports for production while always keeping an eye on what has been shot and how does that fit to the script.

Kurzus teljesítésének követelményei: The course is completed if all the tasks given during the semester are done.
